

Implant Restoration - "Avoiding Costly Mistakes"

Is the clinical outcome of Zirconia abutments comparable to that of metal abutments?

An evening of discovery and learning

This course will enable you to expand your knowledge and skills to make sound evidence based decisions regarding the materials you select when restoring osseointegrated implants. This evening of training will encompass both theoretical knowledge and practical experience.

- **What are the physico-chemical properties of dental implants?**
- **What are the routine options in selecting materials for implant abutments and IS-crowns?**
- **How can the mechanical properties of different materials contribute to marginal bone loss and possibly lead to peri-implantitis lesions?**

The objective of this lecture is "to present the scientific and clinical bases of selecting different materials including precious alloys, titanium, zirconia and lithium disilicate as the implant abutments and crown on osseointegrated implants. Different types of zirconia abutments and their strength and weaknesses will be discussed in this lecture. Also, the latest and most reliable literature in this field will be practically summarized. Differences between Titanium and Zirconia abutments are discussed through assessing their designs, and their mechanical properties.

Your Presenter: Dr Babak Shokati

Board Certified Prosthodontist FRCD(c), MSc. in Dental Biomaterials, Assistant Professor Dept. Prosthodontics, Faculty of Dentistry, UofT. A Fellow of the Royal College of the Dentists of Canada and a member of the Royal College of the Dental Surgeons of Ontario. Dr. Shokati currently conducts clinical research and coordinates Biomaterials Science courses at UofT. Dr. Shokati's Prosthodontic practice is focused on Full Mouth Reconstructions, Dental Implant Surgery, Implant Prosthetics and the Management of Prosthetic and Implant Complications.

When: Wednesday, June 11, 2014

Dinner / Registration: 6:30pm to 9pm

Course: 6:30pm to 9pm

Where: Dr John Viviano & Associates

Michael Angelos Marketplace
4099 Erin Mills Parkway
Mississauga, L5L 3P9

Tuition: Complimentary

Please RSVP By: June 9, 2014

Your Evening Includes:

Dinner catered by Panera Bread

Draw for iPad MINI

CE Points
